

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

A COLLECTION

OF

**BOOKS, PAMPHLETS, LOG BOOKS
PICTURES, ETC.**

ILLUSTRATING

WHALES AND THE WHALE FISHERY

CONTAINED IN THE

FREE PUBLIC LIBRARY

NEW BEDFORD, MASS.

SECOND EDITION, APRIL, 1920

**UNIV. OF
CALIFORNIA**

SH 381
715

In the middle of the last century the district of New Bedford had a fleet of over 400 vessels, mostly ships and barques, engaged in whaling. The introduction of mineral oil as an illuminant, the scarcity of whales, and the Civil War all greatly depleted that fleet, and at the present writing there are no more than one-half dozen vessels which claim New Bedford as their home port.

It is fitting that the New Bedford Library should make a specialty of books bearing on the engrossing subject of whales and whaling. This pamphlet is the revised edition of "A Collection of Books, Pamphlets, Log Books, Pictures, etc., Illustrating the Whale Fishery, Contained in the Free Public Library, New Bedford, Mass." April, 1907. Since the issue of that pamphlet many books and pictures have been added so it seems timely to issue this new edition.

In our city the Old Dartmouth Historical Society, with its Whaling Museum, contains a very complete collection of the utensils and paraphernalia associated with whaling, and the very large model ship housed in that museum affords great interest to visitors. With the books and pictures in the library, the student of this fascinating subject will find very much of interest.

The library solicits additions by gift, or purchase, to its collection.

GEO. H. TRIPP,

Librarian.

LOG BOOKS.

"Look at the manner in which the people of New England have of late carried on the whale fishery. Whilst we follow them among the tumbling mountains of ice, and behold them penetrating into the deepest frozen recesses of Hudson's bay and Davis's straits; whilst we are looking for them beneath the Arctic circle, we hear that they have pierced into the opposite region of polar cold, that they are at the antipodes, and engaged under the frozen serpent of the south. . . . Nor is the equinoctial heat more discouraging to them than the accumulated winter of both the poles. . . . No sea but what is vexed by their fisheries. No climate that is not witness to their toils."—Edmund Burke—Speech on conciliation with the colonies, March 22, 1775.
